Skills

React * Redux * MobX * Apollo * GraphQL * Typescript * Next.js * Node * Express * Mongodb * Jest * React Testing Library
E2E * Storybook * Git * Agile * Scrum * Jira * Figma

Professional Experience

M1 Finance | m1.com | Senior Software Engineer   Jan 23 - Oct 24
  - ➢ Spearheaded personal loan flow rebuild using React, reducing friction, improving user flow and conversions by 25%
  - ➢ Drove multiple project releases, resulting in a 20% increase in user engagement by prioritizing impactful features
  - ➢ Mentored and led junior developers to build good coding habits, strengthen self-reliance in a scrappy environment
  - ➢ Implemented WCAG-compliant accessibility features, ensuring inclusive design and reaching a wider audience
  - ➢ Deployed a high-performance web application using Next.js, leveraging built-in SEO optimizations and server-side rendering to increase organic traffic by 25%, improving search engine visibility and attracting prospective users
  - ➢ Established automated testing pipelines, which reduced bugs in production by 30% and improved product reliability

Artica | artica.com | Senior Software Engineer   Aug 22 - Nov 22
  - ➢ Led cross-functional launch of a new website in 6 weeks, delivering a seamless UX and significantly boosting traffic
  - ➢ Developed a Google Ad feature that cut ad creation time by 400%, saving over 100 man-hours per month
  - ➢ Partnered with design to implement innovative UX solutions, greatly enhancing user satisfaction and engagement

Dutchie | dutchie.com | Senior Software Engineer   Apr 20 - Jul 22
  - ➢ Delivered a redesigned app, leading to a 15% uplift in sales through an optimized, mobile-responsive interface
  - ➢ Drove product lifecycle from concept to release ensuring timely launches through effective cross-team collaboration
  - ➢ Led greenfield FE project, integrated an ACH payments service that became the largest revenue stream
  - ➢ Mentored junior engineers, fostering their growth and contributing to their successful promotions
  - ➢ Introduced LogRocket user journey, improved conversion rates by 10% through data-driven UI optimizations
  - ➢ Integrated gRPC service in Node.js, enhancing system communication efficiency and cutting response times by 20%
  - ➢ Ensured 100% HIPAA compliance and secured sensitive user data, resulting in zero security incidents during tenure

Remine Inc. | remine.com | Software Engineer   Apr 18 - Mar 20
  - ➢ Authored React Native mobile saved searches, working within the mobile team to ensure seamless UX
  - ➢ Developed mobile features that increased user acquisition by 25% implementing social invitation functionality
  - ➢ Developed backend APIs with Node/GraphQL, interfacing with Elasticsearch to optimize data retrieval processes
  - ➢ Optimized the property map, improving load times by 100% and resulting in a 50% improvement in user retention

Phunware Inc. | phunware.com | Software Engineer   Feb 17 - Feb 18
  - ➢ Modernized legacy PHP modules using cutting-edge libraries, greatly accelerating overall development speed
  - ➢ Collaborated across distributed teams to streamline sprint execution, enhancing project efficiency and delivery
  - ➢ Refactored mapping module in React/Apollo with caching, improving both UX and performance by 50%
  - ➢ Achieved 80%+ unit test coverage with Jest, reducing bugs and regressions while enhancing overall code quality

Industry Careers, Inc. | industry.co | Fullstack Developer   Oct 16- Jan 17
  - ➢ Rebuilt Industry app from the ground up as lead full-stack developer, utilizing modern JavaScript technologies
  - ➢ Restructured server code to optimize user profile creation, improving efficiency and streamlining onboarding
